AMENDMENT

#13C w/ attachment

[Handwritten initials]

08/02/99

Assistant Commissioner for Patents
Washington, D.C. 20231

Sir:

IN THE CLAIMS:

Please amend the claims as follows. Unamended claims appear in small type for ease of reference.

31. A method for inhibiting the development of insulin dependent diabetes mellitus, said method comprising administering to a patient a therapeutically effective dosage of glutamic acid decarboxylase (GAD).

34. (Amended) A method as in claim 31, wherein the dosage of glutamic acid decarboxylase is 1-500 mg of the glutamic acid decarboxylase [or fragment] per kg patient body weight.
